

Sheffield Board of Health Public Health Directive

The Sheffield Board of Health voted on September 13, 2021 to issue a directive that all residents, visitors, employers, and employees wear a mask while indoors in public settings, regardless of vaccination status. Further, masks should be worn in crowded outdoor settings when social distancing cannot be maintained.

These precautions have been proven to reduce the risk of illness from airborne diseases, including COVID-19, and to mitigate the spread of such diseases.
